Historical Notes

Briefly following the extinction of some II.PP.A.B., established by Decree of 17 March 1992 of the President of the Lombardy Region published in the Regional Bulletin of 11 May of the same year, the II.AA.RR. administer the four II.PP.A.B. remaining, namely: the “Mons. Francesco Pertusati”; the “S. Margherita Institute”; the “Gerolamo Emiliani” handicap center; the Peppino Franchi Maggi Foundation. In 2003, the entities were merged into a single administration and transformed into a modern Azienda di Servizi alla Persona. For the pursuit of the company mission, namely: to guarantee high technical quality in assistance combined with high humanity; Develop the elderly's residual functional capacity; Address the problems of the elderly in a global manner with targeted and personalized interventions; To ensure continuous training of staff to support motivation and develop professional preparation, the Analysis Laboratory is inserted with the main objective of giving an immediate response to those hospitalized in ASP facilities and responding to the needs of local customers.

Permissions

The Basic Analysis Laboratory was reclassified with Lombardy Region communication no. 234/2023 of 5/10/2023.

OBJECTIVES FOR IMPROVEMENT

The *Santa Margherita Medical Analysis Laboratory* intends to guarantee and improve the quality of the services offered through:

- the continuous updating of its technological and professional know-how
- the extensive use of information technology (ICT)
- the adoption of analytical processes that provide precise and reliable results and that reduce the availability time of reports
- the use of technologies that safeguard the health of operators and the environment
- participation in intralaboratory (CQI) and interlaboratory (EQA) quality control programs
- the promotion and development of continuous improvement projects.
